Formulation

(SP) - Soluble powder

Distributor

SINA Morocco

INAFOL EVO is a compound NPK fertilizer, foliar application, developed to be used in times of increased demand of potassium from the vegetative cycle.

The contribution of INAFOL EVO optimizes the processes of hardening of the nucleus, the cell differentiation, the accumulation of reserves and the maturation of the fruits, giving rise to an optimal nutritional state, which strengthens the plant vis-a-vis the physiological and climatological alterations and generates a best answer on all types of phytosanitary treatments.

COMPOSITION

Nitrogen (N) total 14%

Nitrogen (N) nitric 7.8%

Nitrogen (N) Ammonia 3.6%

Nitrogen (N) urea 2.6%

P₂O₅ soluble in water and neutral ammonium citrate 5%P₂O₅ soluble in water 5%K₂O soluble in water 28%

MgO soluble in water 2%

Boron (B) soluble in water 0.9%

Crops	Reasons for application	Rate
All kind of crops	Increase in size and firmness of the fruit, use early in fruit development and 1-2 times in 15-day intervals.	400-600 g/hl
